PROFESSIONAL SUMMARY

I am a passionate and detail-oriented Full-Stack Web Developer specializing in creating modern, responsive, and high-performing web applications for businesses, brands, and individuals. I build professional websites and web solutions that not only look great but also help clients increase their online presence, attract more customers, and grow their businesses.

My expertise spans both frontend and backend technologies, including HTML, CSS, JavaScript, React, Node.js, PHP, MySQL, MongoDB, Firebase, API integration, responsive web design, landing pages, business websites, e-commerce websites, portfolio websites, and website optimization. I focus on clean code, fast loading speeds, mobile-friendly designs, secure backend logic, and excellent user experiences.

I believe every business deserves a website that reflects its brand and builds trust with customers. I work closely with clients to understand their goals and deliver high-quality full-stack solutions on time. Whether you need a brand-new website, a redesign, backend integration, or improvements to an existing site, I am committed to providing reliable service and exceptional results.
